Close to home: Moving from planning to implementation at the sub-national level.

Asia Adaptation Forum, 3rd October 2014

Elizabeth Gogoi, CDKN

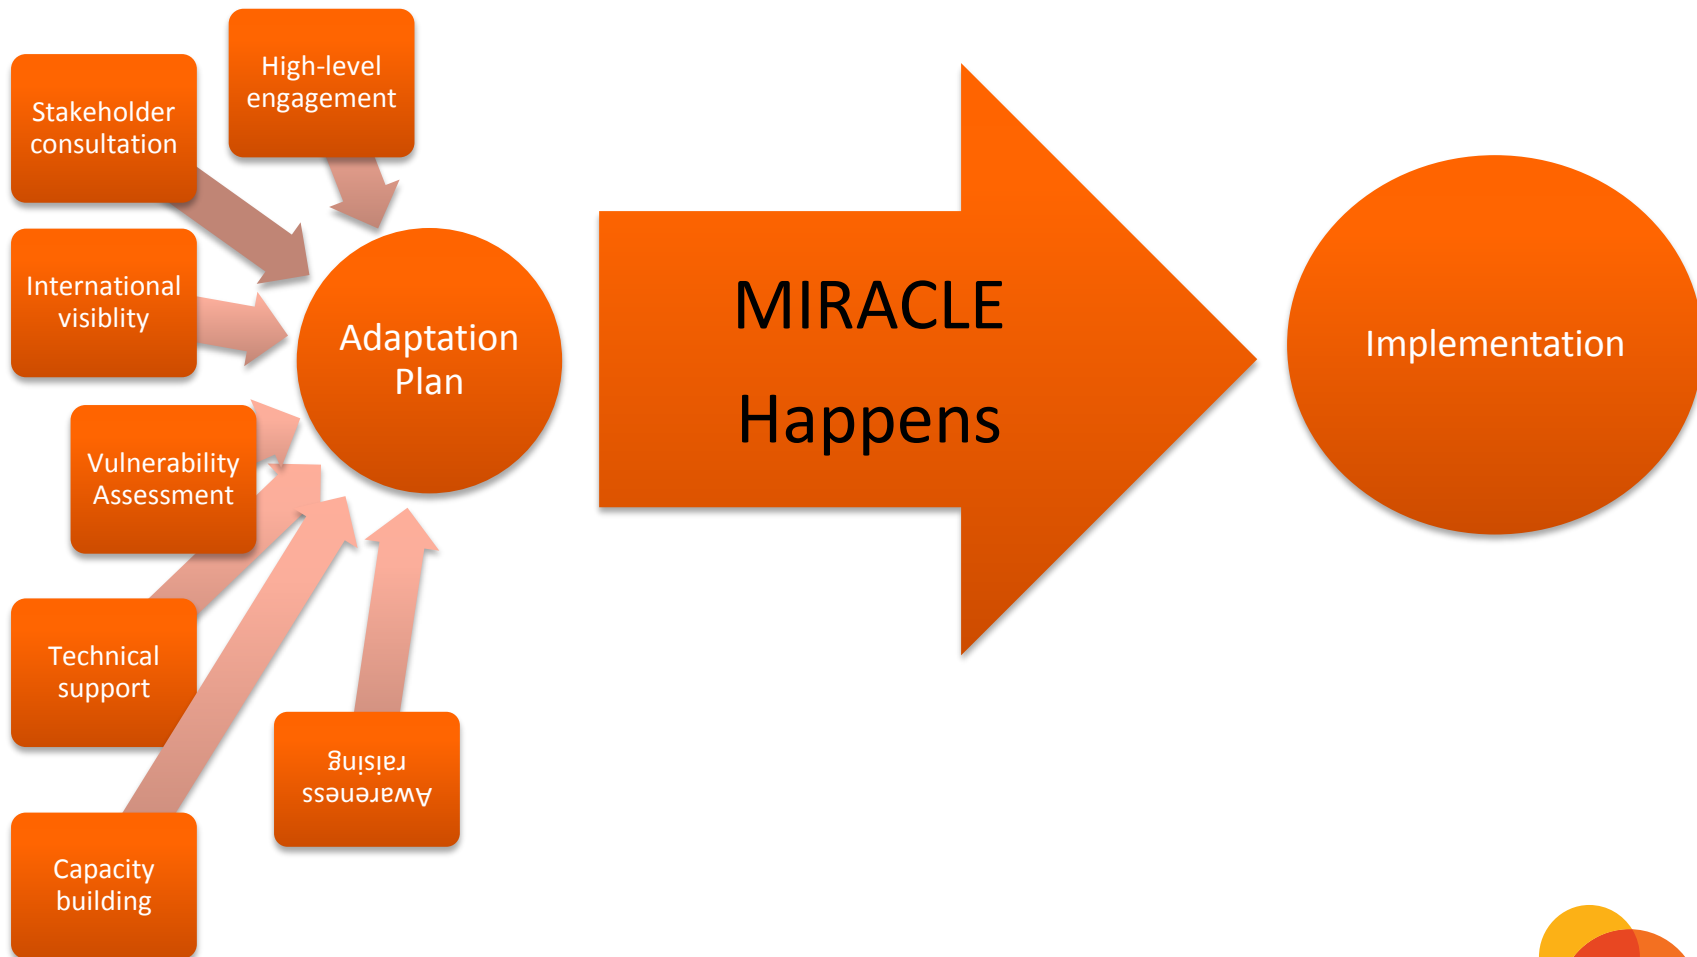

Why sub-national?

Why Implementation?

The implementation gap

The defence of the local environmental bureaucrat

Think about implementation... when planning...

During the planning process

- How was it developed? And Why?
- Is there ownership?
- Are the budget holders on board?
- Are the opposing interests convinced?
- Is the national government supportive?

When developing the content of the plan

- Does it match local and national priorities?
- Is the funding source identified?
- Is it realistic?
- Does it fit within existing programmes and structures?

But don't stop there...

Support the implementation process...

- **Connect with funding sources**
- **Build and institutionalise capacity**
- **Technical next steps**
- **Repeat annual planning**
- **Seed funding**

Monitor implementation

- **Institutional mechanism for review**
- **Civil society's role in holding government to account**
- **Communicate success**

Thank you!

**And watch out for our 'sub-
national Climate Compatible
Development Learning
Programme'**
