TRANSFORMATION FOR ALTERNATE DEVELOPMENT PATHWAYS

Role of Foresight & Futures Thinking
Future is not necessarily continuation of the past

London 1867

In 1867, a British scientist predicted that London's population would grow very fast over the next 100 years...

...because of the population growth, he argued, also many more horse carriages would be needed...

...and knowing about the horses' public bathroom habits, he concluded:

By 1967, London would be buried six feet deep in horse dung!
