# AXA Climate

We enable companies to adapt to climate change

# Today

**Businesses impact climate  
as much as  
climate impacts businesses**

# Tomorrow

**Corporate responses to the climate crisis will be a greater predictor of success than digital transformation has been over the past 30 years.**

## Our purpose

**Help Planet Earth become a stakeholder of all companies.**

Just the same way employees, customers and shareholders are.

## Our mission

**In 2021, we enable  
companies to adapt to  
climate change.**

# We developed complete business lines to tackle climate change adaptation

# Finance  
# Agriculture  
# Industry

**Training**

**Services**

**Consulting**

**Insurance**

# How to engage and grow your people on climate?

An action-oriented training to enable every employee to be motivated enough to play their part

A readiness assessment to build a picture of the employee engagement

A digital tailored platform with premium contents and certificates to build indepth knowledge

Online/Presential sessions with experts & groups of learners to build a movement

Services

# How to protect in real time employees and businesses?

CYMO, the 24/7 Natural Hazard Protection Platform

Real time monitoring & personalized alerting by climate risk experts

Street-level and site-specific alerting with our worldwide coverage (satellites, drones, social medias, ground stations)

Building resilience from post-event visual assessment right after the natural disaster

The CYMO logo, featuring a blue arc to the left of the word 'CYMO' in white capital letters.

Consulting

# How to adapt your assets & value chain to climate change?

We guide you through your climate adaptation journey by sharing data and knowledge to make you smarter

Global Risk Assessment to identify at-risk assets from your portfolio or for acquisitions

Local Vulnerability Assessment and adaptation level score for your most at-risk assets

Local Adaptation Plan to build resilience and take opportunities

# How to adapt your agricultural practices to climate change?

We strengthen the resilience of agricultural supply chains

Global assessment to spot at-risk crops / regions / markets of your supply chain

Local assessment of climate change impact on yield and quality, and test of adaptative measures

Local adaptation plan to identify the best agricultural practices to build resilience

Insurance

# How to secure your ecological transition?

We provide tailor-made protection solutions, mixing insurance and services

Protection of farmers' margin while reducing the use of phytosanitary products in their fields

Emergence warranty embedded with seed bags sold by seed providers

“Yield as a service”, combining high-tech equipment, leasing solutions, advisory and insurance

# How to recover faster?

We provide Parametric insurance, the only way to be paid within hours after a climate event

You choose the index, the thresholds and the payouts adapted to your risks

Thanks to an independent source of data, you monitor the index and see if the cover is triggered

Once triggered, you confirm your losses and you receive your payment within hours

**Our secret sauce?  
We make you smarter!**

## We give you our data

Full transparency, end-reports and raw data are yours.

## **We adapt to your specific needs, at your speed**

We do tailor made, fast.

## **We focus on impact**

We dig the « So What? » and propose concrete actions.

## **We build long term partnerships**

As our customer, you join our AXA Climate Club with a large range of services.

Climate

## Global Footprint

+ 100 employees over 5 continents

## Earth Expertise

Partnerships with world renowned experts

## AXA Group Integration

Part of the AXA Group, we are integrated into a global ecosystem of talents & expertise

# Ready to adapt?

# Let's talk!

How climate will change where my family live?

Where should I start to adapt?

How can I engage my people on biodiversity?

How can I ensure transition for my agroforestry business?

**And many more questions you may have...**
