

# Session I - Discussion Questions

## *Assessments of climate change scenarios and impacts*

- ▶ Has your country used any innovative approaches or tools to understand CC scenarios and impacts?
- ▶ What are the main challenges faced in developing CC scenarios and using them to inform effective adaptation planning/decision making?
- ▶ Does your country have any successful experiences in downscaling and localizing CC scenarios and impact models?

## Session II - Discussion Questions

### *Assessments of risks, hazards and vulnerabilities*

- ▶ Has your country used any innovative approaches or tools to assess risks and vulnerabilities?
- ▶ What are the main challenges faced in conducting risk/vulnerability assessments and using them to inform effective adaptation planning/decision making?
- ▶ Risk and vulnerability assessments are often applied at the local level, but in your country how have these approaches supported national-level adaptation planning/decision-making?

# Session III - Discussion Questions

## *Assessments of effectiveness on CCA countermeasures*

- ▶ Has your country used any innovative approaches or tools to assess the effectiveness of CCA options and countermeasures?
- ▶ What are the main challenges faced in assessing CCA options/countermeasures and using them to inform effective adaptation planning/decision making?
- ▶ What are the perceived differences in benefits among the three different forms of assessment and what are their unique contributions to adaptation planning?
  - ▶ *Which form of assessment is easiest to conduct and which form of assessment is easiest to understand?*
