

Technology Mechanism under Cancun Agreement: Types of Services

Regional Office of
Asia and the Pacific

Contents

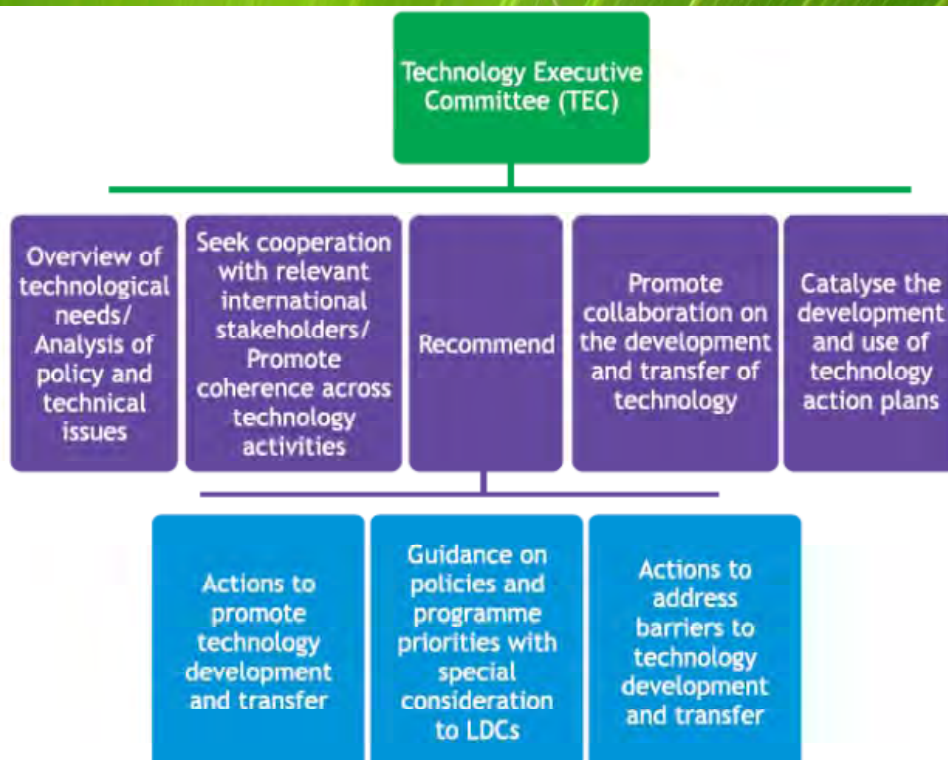

- 1 Technology Mechanism
- 2 Technology Committee
- 3 Technology Centre and Network
- 4 Suggestion for Discussion

Technology Mechanism

environment for development

Technology Mechanism

environment for development

Technology Mechanism

Climate Technology Centre and Network (CTCN)

At the request of a developing country Party:

1. Provide advice on technology needs
2. Facilitate the provision of information and training
3. Facilitate the development of existing technology

Stimulate through collaboration, technology development and transfer as well as opportunities for North/South, South/South and triangular technology cooperation

Facilitate a Network of national, regional, sectoral and international technology centers, networks, organizations and initiatives

- Enhancing cooperation with technology centres and relevant national institutions
- Facilitating international partnerships
- Providing in-country technical assistance and training
- Stimulating the establishment of twinning centre arrangements
- Identify, disseminate and assist with developing analytical tools, policies and best practices

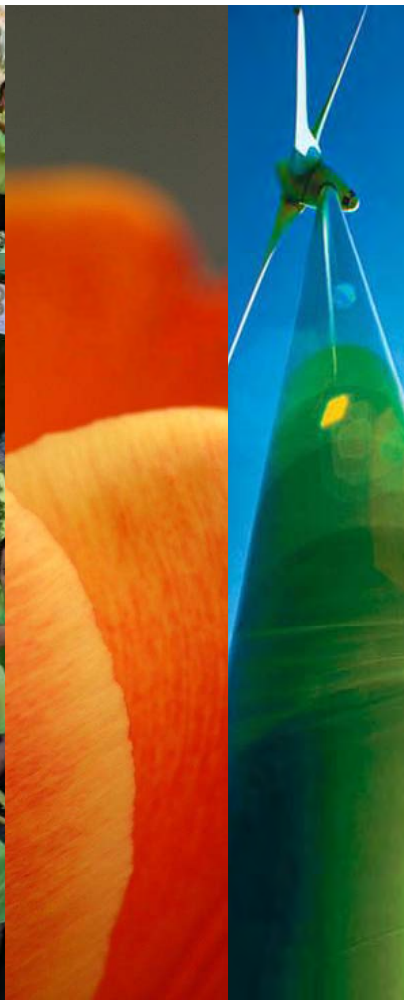

environment for development

Suggestion for Discussion

- What types of in-country technical assistance and training are necessary in the context of mitigation;
- What types of support can stimulate the establishment of twinning centre arrangements to support mitigation;
- What specific types of analytical tools, policies and best practices will help South Asian countries to promote mitigation;
- What can be delivered and can not be delivered at South Asia at Sub-regional level considering diversity and context specificity of the country;
- 3-5 Priority activities at sub-regional level and at a smaller group of country level

environment for development

Thank you
