

## Inclusive Resilience

# From Words to Action: What More Should Be Done to Ensure Resilience for All in Asia and the Pacific?

**22.10.2020**

14:00 (GMT +7); 16:00 (GMT +9)

**Duration: 90 mins**

## Scope

This virtual dialogue will catalyse thinking and actions on how we achieve inclusive resilience in the context of the deepening climate emergency and the need for urgent actions in a world still to recover from a pandemic. The dialogue will help to meaningfully engage with marginalized and vulnerable voices in joint conversations and proactive actions. By soliciting ideas and approaches from the audience, the dialogue will gather insights and inspirations that will facilitate a meaningful, inclusive, productive and insightful design of the Inclusive Resilience stream of the 7th APAN Forum.

### Key expected outcomes for this webinar are:

- Learn about successes and challenges of inclusive resilience and identify actions including scalable actions to ensure inclusive resilience;
- Identified key priorities to be discussed during the Forum;
- Gathered insights on how best to design the Forum to maximize meaningful impacts.

Participants in the dialogue will discuss emergent and critical priorities on inclusive resilience to climate change impacts in Asia and the Pacific. While they will also gain new insights, they will also share their experiences on how inclusive resilience will be pursued in important vulnerable groups or communities.

## Key questions to be discussed

- Who are the vulnerable groups that are not yet adequately represented in climate change adaptation discussions in your locality or region and how should we ensure that they are not left behind?
- How do we reach those furthest behind through the five enablers: policy and climate governance, planning and processes, financing and investing, science and assessment, and technologies and practices?
- How can we maximise commitments made by countries in international human rights treaties and global compacts such as the Paris Agreement, the 2030 Agenda, Sendai Framework, and the New Urban Agenda to push for more inclusive climate resilience?

Agenda		Time
Registration	Via <a href="#">Zoom</a>	13:30 – 14 :00
Welcome	Mr. Niall O'Connor, Centre Director, SEI Asia	14:00 – 14:05
Inspirational Talk	Ms. Angie Mead King, CEO,Victoria Court and Founder, King Tower Farms	14:05– 14:15
Inclusive Resilience Outlook	Dr. Albert Salamanca, Senior Research Fellow, SEI Asia	14:15 – 14:25
